# WestEd's ScienceSketch Project A Research Study on Science Modeling

Funded by the U.S. Department of Education, WestEd, in partnership with the North Carolina State University, is examining the impact of ScienceSketch, an NGSS-aligned science modeling platform.

# Who can participate?

- 4th grade teachers who teach science.
- Participating classrooms will need 1-to-1 device access.

### Timeline

• Fall 2025 for 8 weeks.

### **Research Activities**

- Half of the participating classrooms will be randomly selected to use ScienceSketch (treatment group). Half of the teachers will continue regular science instruction and receive access to ScienceSketch later (control group).
- All teachers will complete a pre- and post-survey (10 minutes) and 3-4 logs (5 minutes). Some teachers will participate in a classroom observation and an interview.
- **Treatment** group teachers will use ScienceSketch with their students for modeling once per week and will complete 2-3 hours of virtual, self-paced professional development.
- **Control** group teachers will have access to ScienceSketch and the professional development after the study.
- Students will complete an NGSS-aligned science preand post-assessment (30-45 minutes) and a survey (10 minutes).

### **Benefits**

- No cost to participate.
- Students will practice science modeling skills to align their instruction with NGSS guidelines.

## Compensation

• Teachers will receive a stipend of up to \$500. Treatment group teachers will receive an additional \$200 for completing professional development.

# What is ScienceSketch?

ScienceSketch, developed by North Carolina State University, is a supplemental digital modeling platform.

Students draw NGSS-aligned science models in ScienceSketch and receive individualized and adaptive scaffolded feedback to practice science modeling in engaging and meaningful ways, saving teachers valuable time.
